

### The Danish Road Weather Information System

Pernille Arnsfelt Hansen and Søren Brodersen (Forecasters)

Danish Meteorological Institute

$$ID = 13$$

#### The Challenge:

Provide complex meteorological information in a non-complex format

### The Construction Syndicate:

Road People

Weather People

IT People

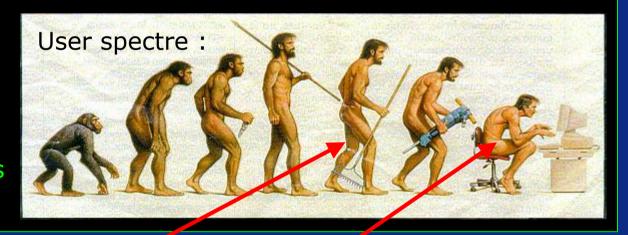

#### The Users:

Basicly everyone with interests in slippery road conditions...

#### The Users:

Basicly everyone with interests in slippery road conditions:

- ➤ Road authorities, State, Region, Community, City....
- > Entrepreneurs
- **≻**Airports
- > Harbours
- **≻**Hospitals
- ➤Other authorities

Owner of truck or shovel, may have drivers license

Engineer, who is a full time computer- and weathernerd

#### Task:

Provide information, easy to interprete

Use graphics and colours – as little text as possible

Easy access, use www, even mobile broadband

Provide a good manual

Teach the user the basics in road weather...

### Teach the user the basics in road weather...

Road temperature negative?

Snowfall or freezing precip?

Wet road?

**Dewpoint Higher?** 

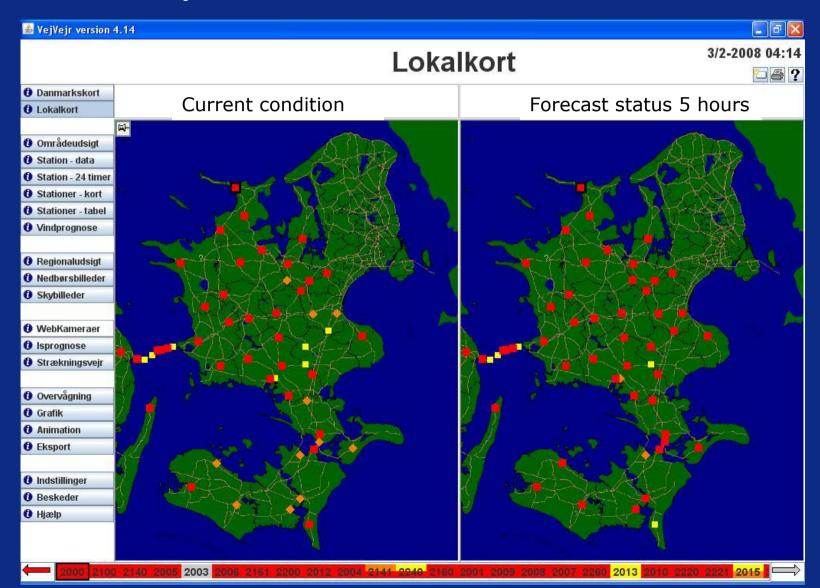

### Describe this using colours

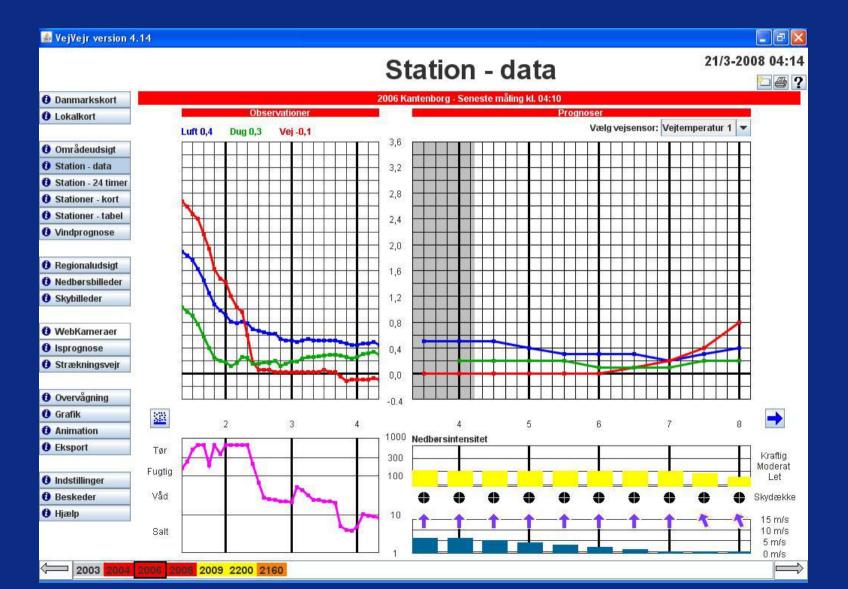

## Basic principles of colourcoding

| Alarm status | Description                                       |
|--------------|---|
| White        | T <sub>Road</sub> > + 2 °C                        |
| Yellow       | $0 \text{ °C} < T_{Road} \le + 2 \text{ °C}$      |
| Orange       | $T_{Road} \le 0$ °C and $T_{Dew} < T_{Road}$      |
| Red          | $T_{Road} \le 0$ °C and $T_{dew} \ge T_{Road}$ or |
|              | $T_{Road} \le 0$ °C and $T_{Dew} = T_{Air}$       |

## Local-map

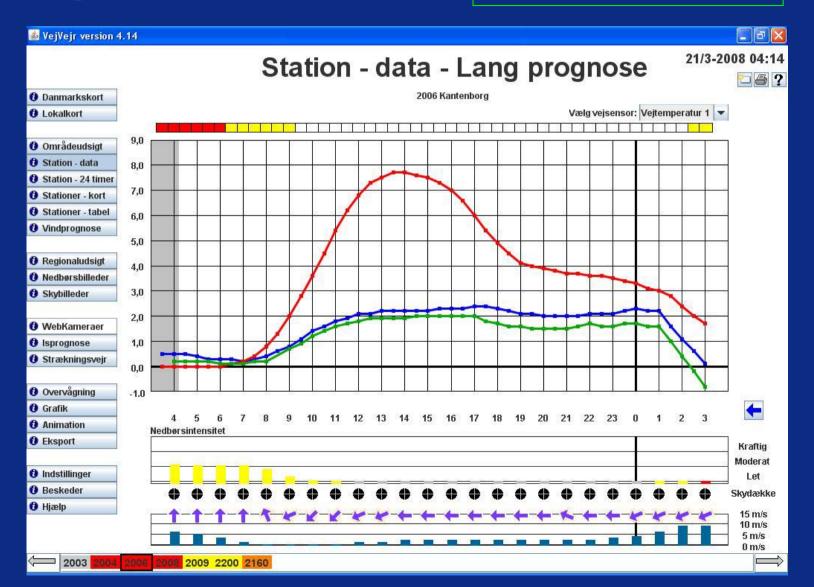

### Station - data

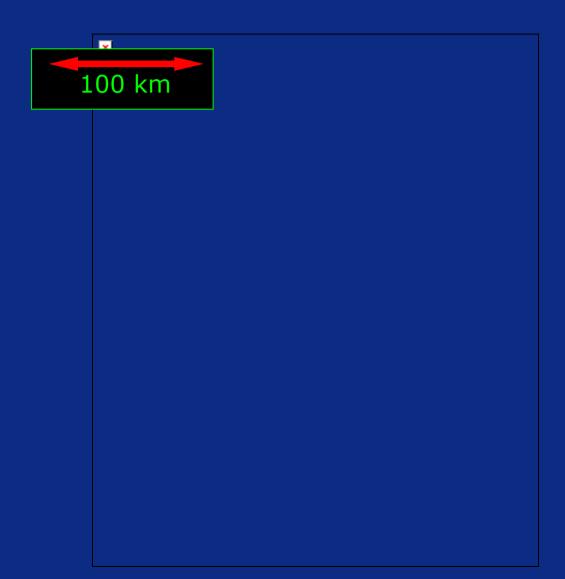

## Long forecast

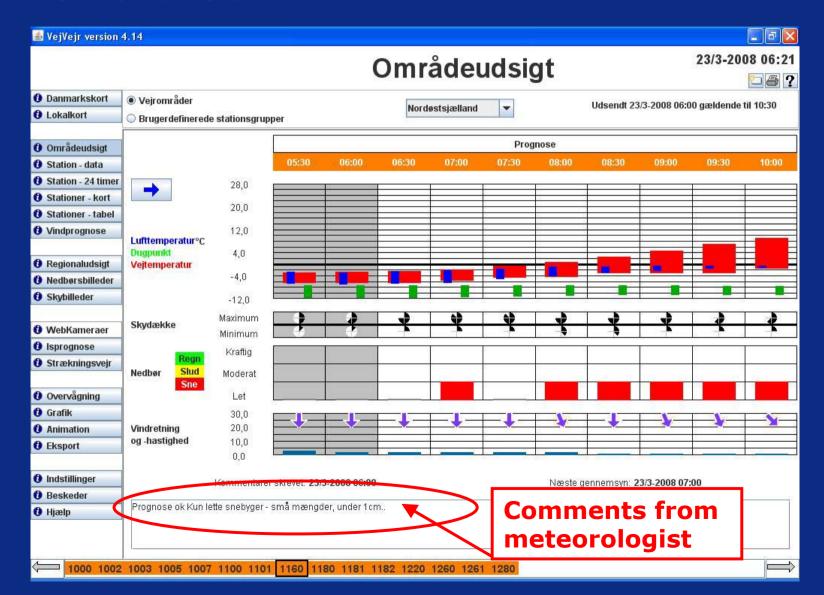

~330 stations!

## Denmark in "weather-areas"

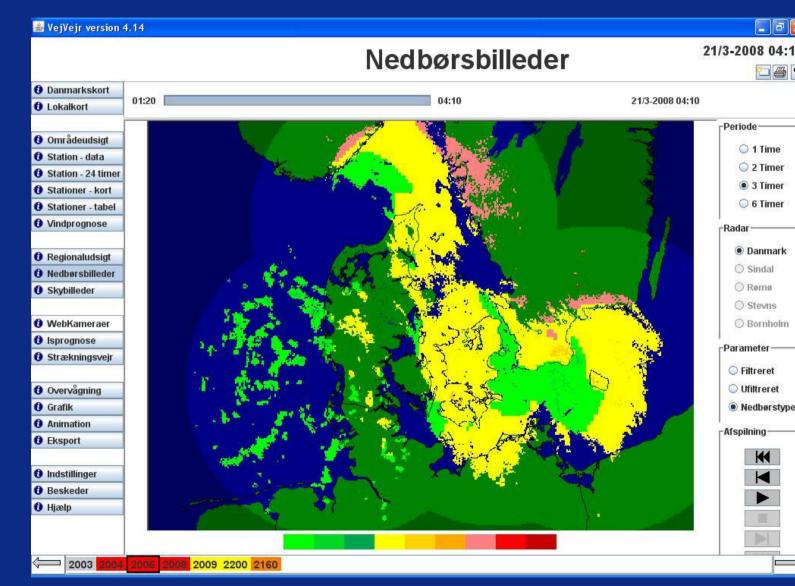

### Area forecast

## Radar images (Precipitation)

Rain Mix Snow FRZ

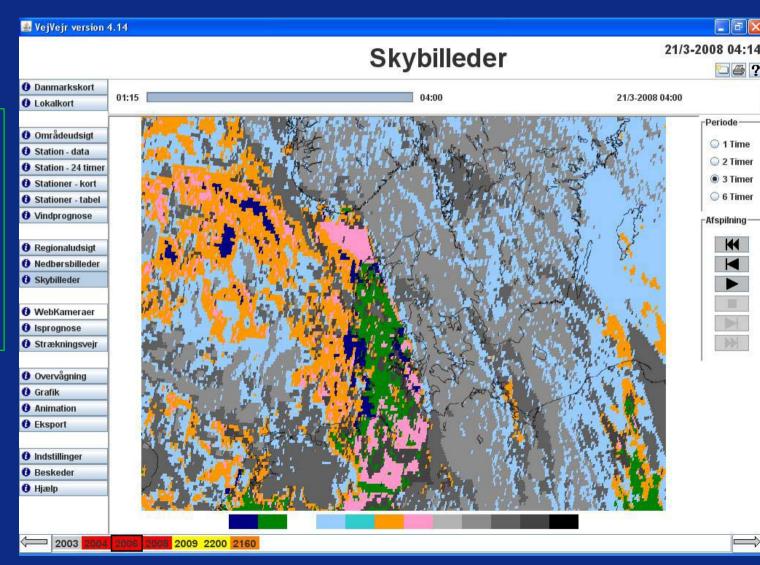

## Satellite imagery (Cloudcover)

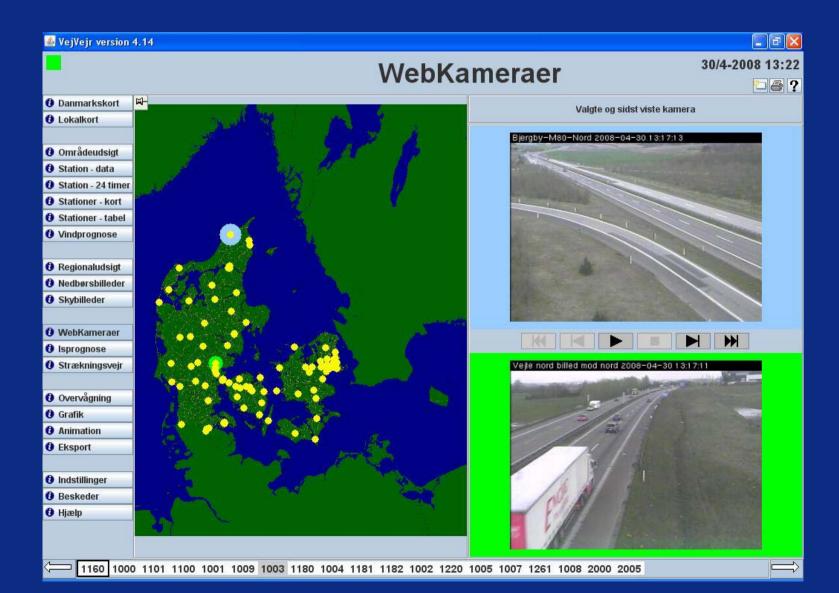

Shades of grey:

Clouds are thick.

Colours:
Clouds are
scattered or
high/thin

### Web-cams

## How to improve the system?

- Feed-back from users
- Performance continuously verified
- Day seminar every year

## How to improve the users?

- Intro demo
- 1-day course, beginners
- 1-day course, advanced
